First, lets create individual maps of 3 states.

### Washington

```
geoc map draw -l "layertype=layer file=src/test/resources/data.gpkg layertype=layer  
style=src/test/resources/ocean.sld" -l "layertype=layer  
file=src/test/resources/data.gpkg layertype=layer  
style=src/test/resources/countries.sld" -l "layertype=layer  
file=src/test/resources/data.gpkg layertype=layer  
style=src/test/resources/states.sld" -b -124.68721008300781,45.59199778907822,  
-116.90652787968992,49.000885321643864 -f target/state_washington.png
```

## Oregon

```
geoc map draw -l "layertype=layer file=src/test/resources/data.gpkg layername=ocean  
style=src/test/resources/ocean.sld" -l "layertype=layer  
file=src/test/resources/data.gpkg layername=countries  
style=src/test/resources/countries.sld" -l "layertype=layer  
file=src/test/resources/data.gpkg layername=states  
style=src/test/resources/states.sld" -b -124.53283999999996,41.99260508886846,  
-116.45779557988342,46.2830694871044 -f target/state_oregon.png
```

## California

```
geoc map draw -l "layertype=layer file=src/test/resources/data.gpkg layername=ocean  
style=src/test/resources/ocean.sld" -l "layertype=layer  
file=src/test/resources/data.gpkg layername=countries  
style=src/test/resources/countries.sld" -l "layertype=layer  
file=src/test/resources/data.gpkg layername=states  
style=src/test/resources/states.sld" -b -124.39795772362243,32.535327053348965,  
-114.16597164595498,41.99947805436335 -f target/state_california.png
```

Now lets stitch them together into an animated GIF.

```
geoc raster animatedgif -f target/state_washington.png -f target/state_oregon.png -f  
target/state_california.png -o target/states.gif
```
