## Projection Commands

### Envelope

Get a Projection's envelope.

| Short Name | Long Name          | Description                                   |
|------------|--------------------|---|
| -e         | --epsg             | The EPSG Projection code                      |
| -g         | --geo-bounds       | The flag for whether to use geo bounds or not |
| -o         | --output-workspace | The output workspace                          |
| -r         | --output-layer     | The output layer                              |
|            | --help             | Print the help message                        |
|            | --web-help         | Open help in a browser                        |

```
geoc proj envelope -e EPSG:2927 -g -o target/envelope.shp
```

### WKT

Get the WKT of a Projection

| Short Name | Long Name     | Description                    |
|------------|---------------|--------------------------------|
| -e         | --epsg        | The EPSG Projection code       |
| -f         | --file        | The output File                |
| -c         | --citation    | The citations (epsg or esri)   |
| -i         | --indentation | The number of spaces to indent |
|            | --help        | Print the help message         |
|            | --web-help    | Open help in a browser         |

```
geoc proj wkt -e EPSG:2927
```
